2016 Associates Campaign Quick Responses

I don't like the Campaign project so I am not supporting the Associates Campaign this year.

A: It's ok! Everyone is passionate about a different St. Vincent program or cause. While the waiting room renovation is the highlighted project for the Associates Campaign, you can support *any* St. Vincent program you would like. This will help ensure that 100% of your contribution is directly benefiting the area most important to you!

Why are we supporting another waiting room? The hospital should be paying for that.

A: The hospital is very invested in this project, which is why they are providing a dollar-for-dollar match for all associate contributions to help complete the renovations!

My area/department is never selected for the project.

A: All St. Vincent departments are important, and we respect the needs and areas in your department! Every fall, associates are given the opportunity to submit their project ideas for consideration through an application process. Be sure to keep an eye out for the application for the 2017 Associates Campaign if you have an idea you would like to submit for your department!

I am still paying on my pledge from last year. Why are you asking me to give again this year?

A: Thank you so much for your contribution last year! Because of your support of the St. Vincent House, we are ahead of schedule and plan to open the new facility in early 2017. Your pledge from last year counts towards our participation goal for this year's Campaign, but it does not count towards our fundraising goal since it was already accounted for. While there is no obligation, I hope you will consider a small, one time gift to this year's Campaign at a level you feel comfortable.

My small gift won't make a difference.

A: The impact of the Associates Campaign isn't the result of one or even a few associates – it's the result of many associates coming together year after year to make a difference. Every gift of every size is important!
